

## **Parking and Speeding Report 2021**

### **Parking .**

In some parts of Syresham parking is still a problem which cannot be easily solved owing to there being so many more cars on the road.0

### **Speeding.**

There have been several complaints regarding speeding through the village it was suggested that the village should be 20mph . I did meet a County Council advisor re the flashing warning signs it was considered we would need one either end of the village ie High Street and Abbey Road these would have to be paid for and have to have them specially erected.

### **Parking on Pavements.**

There have been a few problems with people parking on the pavements these have received letters asking them to refrain from this.
